

For examples of existing situations where you are using the legacy ACS Software, the chart below should help identify if an upgrade to the new software should be considered:

Possible Scenario	Action
I'm happy with my current E-Plex locks, M-Unit and software	None
I'm happy with my current E-Plex locks, M-Unit and software, however, I want to purchase more locks to work with my existing system	<ul style="list-style-type: none"> • Just purchase the quantity of E-Plex locks you desire. • They will continue to work with your existing system
I'm happy with my existing E-Plex Advanced Access Control (ACS) software (EP-3000-SW), but I need a new M-Unit.	<ul style="list-style-type: none"> • Purchase a compatible M-Unit from the Approved PDA list at kabaaccess.com, • OR you can upgrade to the new standard software (EP-EPRISE1-SW), which allows you to use laptops/mini laptops/Netbooks or Pocket PCs as your M-unit.
I'm using the E-Plex Advanced Access Control Software (ACS) , but want the additional functionality of the Enterprise software	<ul style="list-style-type: none"> • You will need to purchase the Enterprise software and a respective M-unit that functions with it as stated above.

E-Plex Enterprise Software documentation will be available on the Kaba website effective **September 10, 2009** at www.kabaaccess.com by clicking the "Literature Grid" under the Literature and Support heading.
