

# MS1 Software Features:

- MS1 Software is included with the purchase of any RTS Series Lock
- Windows® XP, Vista, Windows 7 32/64-bit, Windows 8, Windows 8.1, and Windows 10 compatible
- Login to MS1 Software can be set to validate password, fingerprint, or both
- Overview shows Lock Groups, Locks, and number of users per lock; allows the user to Lock/Unlock individual network (PoE and Z-Wave) locks all from one convenient area
- Blended interface supports entire RTS family of locks: standalone (USB), PoE, and Z-Wave
- Ability to create unlimited number of Lock Groups and provide meaningful names for each group
- Ability to create 9,999 locks under any Lock Group and provide a meaningful name for each lock
- Timed Unlock Mode for each lock
- Programmable User Access Times "first person in"
- Scheduled Unlock Mode capability
- Holiday Mode programming for each lock
- Lock sensitivity settings programmable on lock-by-lock basis
- Verification mode settings per lock allows quicker look-ups of stored credentials
- Hover-over help tips for most fields within MS1 Software
- Interfaces to USB or fingerprint reader for enrollments
- Interface to USB Z-Wave controller stick allows direct communications with Z-Wave enabled devices
- Add users individually or in bulk using .CSV format file import
- Onboard graphics reflect the current state (locked or unlocked) for Z-Wave and PoE locks
- Multiple login IDs per MS1 Software with Admin/User privileges
- Lock and User (individual and bulk) wizards for ease of programming
- Cut/paste functionality for ease of programming 3 Administrators, 4 Managers, and 1,000/3,000 users per lock (where applicable)
- Add/remove user to/from one or multiple locks
- All configurations can be pushed to the locks either by Z-Wave (RTS-Z Lock series), USB (all RTS models), or PoE
- All audit information can be retrieved from the locks by Z-Wave (RTS-Z Lock series), USB (all RTS models), or PoE
- PIN code and fingerprint enrollment (needs fingerprint scanner) from MS1 Software
- Per user Access Time definition
- Audit trail editor screen provides users view, storage, print, and export options
- Z-Wave section of MS1 Software allows for enrollment and communication with RTS-Z Lock series, as well as generic Z-Wave devices
- Firmware updates to RTS-Z Lock series can be performed from MS1 Software
- Event management log shows who has accessed MS1 Software and what changes were performed
- Database Import and Backup, as well as the ability to pre-process and import legacy databases into MS1 Software, making easy migration from previous versions
- Access to online help via Knowledge Base or email to STRATTEC Advanced Logic support
